The PSN Top Guns awards are among the most rigorous and respected rankings in the managed account industry. They evaluate thousands of separately managed account (SMA) strategies using stringent quantitative criteria, including information ratio, performance relative to benchmark, correlation to style benchmark, and risk-adjusted returns. Only GIPS-compliant managers are eligible, making the award a true mark of distinction for top-performing strategies.

“We are incredibly proud of this recognition” said Arch Peregoff (Founder & CIO) “Achieving Top Gun status for the three-year period demonstrates that our differentiated, high conviction approach can generate reliable income and total return, while maintaining a risk profile consistent with an investment grade bond portfolio. We look forward to continuing to deliver industry leading performance on behalf of our clients and sub-advisory partners.”

About PSN: The PSN database, maintained by Zephyr (a division of Informa), is North America’s longest running and most comprehensive database of separately managed account (SMA) strategies. With nearly 40 years of detailed performance history covering more than 2,800 firms and 21,000+ products, PSN is widely recognized as the industry standard for SMA evaluation.

About Seabird Investment Partners: Seabird Investment Partners is a leading investment boutique specializing in value oriented fixed income and equity investments. Seabird Investment Partners works alongside financial professionals, families, and other entrepreneurial investors seeking above average rates of return.
